

Industrial RS-232/TTL 5V Converter

Part Number: TTL-232-1

Communications made easy

■ INTRODUCTION

The TTL-232-1 is a compact, rugged, industrial grade, port-powered, bi-directional RS-232 to 5VDC TTL converter, which can be used to convert RS-232 to 5VDC TTL compatible levels and vice versa. This industrial grade RS232 to TTL converter operates within a temperature range of -40°F to 185°F (-40°C to 85°C), and features 600W surge protection and 15kV static protection. The unit is powered from the RS-232 data line, and therefore, it requires no external power or software drivers, making the unit a rugged, highly reliable, and truly plug-and-play device.

■ FEATURES

■ TTL SIGNAL LEVELS

TTL Input	TTL Output
High (>2.0V)	High (5.0V)
Low (<0.8V)	Low (0.0V)

■ TROUBLESHOOTING

- Perform a loopback test by using CommFront's 232Analyzer software: Connect TX (TTL Out) to RX (TTL In), and then send commands from the 232Analyzer software. You should receive an echo of the commands sent. By performing a simple loopback test like this, you can test both the transmitter and receiver of the RS-232/TTL converter. This is very helpful when you are in doubt about the performance of your converter.
