

USB ⇔ Dual TTL 3.3V Converter

Part Number: **USB-232A-1+2xTTL33-232-1**

■ INTRODUCTION

This USB ⇔ dual TTL 3.3V converter is a port-powered bi-directional USB to dual TTL/CMOS 3.3V converter, which can be used to convert any standard full-duplex USB port into two full-duplex TTL 3.3V ports and vice versa. The unit is powered from the USB port and it supports data auto-sensing & self-adjusting, and therefore, no baud rate setting is required.

The unit uses the latest FTDI chipset and is fully compatible with Windows 7/Vista/XP/Server2008/2003/2000/98 (32-bit), Windows 7/Vista/XP/Server2008/2003 (64-bit), Win CE, Mac, and Linux. Note: the latest drivers (chipset FT232B) are available at <http://www.ftdichip.com/Drivers/VCP.htm>.

■ FEATURES

- Adds two TTL 3.3V ports to your USB port.
- Supports 300 to 115,200 baud (auto-sensing and self-adjusting).
- Supports Windows 7/Vista/XP/Server2008/Server2003/2000/98 (32-bit), Windows 7/Vista/XP/Server2008/Server2003 (64-bit), Win CE, Mac, and Linux.
- Supports remote wakeup and power management.
- Plug and play (hot-pluggable, data format auto-sensing and self-adjusting).
- Port-powered, no external power required.
- No IRQs required, no IRQ conflicts.
- Surface Mount Technology manufactured to RoHS and ISO-9001 standards.
- Safety: Strictly certified by SGS/TUV; 5-year manufacturer's warranty.

■ SPECIFICATIONS

Compatibility:	USB 2.0 (backward compatible) and TTL/CMOS 3.3V level
Power Source:	From USB port
Current Consumption:	Less than 100mA
Baud Rates:	300 to 115,200bps (auto-sensing and self-adjusting)
Distance:	USB side: 10ft (3m); TTL side: 10ft (3m)
Connectors:	USB side: Type A female; TTL side: 2x DB-9 male; 2x Termination board: DB-9 female and a 3-way terminal block
Dimensions (HxWxD):	0.9 x 2.8 x 6.2 in (24 x 72 x 158 mm) (excluding cable)
Cable Length:	2 ft (0.6 m)
Weight:	5.5 oz (155 g)
Operating Temperature:	32°F to 95°F (0°C to 35°C)
Operating Humidity:	Up to 90% RH (no condensation)

■ PIN ASSIGNMENT

TTL Side (DB-9 Male Connector / Terminal Block):

DB-9 Pin:	1	3	5
Terminal Block:	TX	RX	GND
Function:	TTL OUT	TTL IN	GND

Termination Board:

- The numbers on the left indicate the pin assignment of DB-9 male connector (TTL side).
- TX is the TTL Output, RX is the TTL Input.

■ CONNECTIONS

(FIGURE 1: USB-DUAL-TTL 3.3V CONVERTER CONNECTION DIAGRAM)

■ TTL SIGNAL LEVELS

TTL Input	TTL Output
High (>2.0V)	High (>2.4V)
Low (<0.8V)	Low (<0.6V)

■ TROUBLESHOOTING

- Make sure that the USB-Dual-TTL 3.3V converter is connected to your USB port, and the driver is installed correctly (as shown below); otherwise, please reinstall the driver (refer to <http://www.commfront.com/USB-Driver-Installation-FTDI.htm> for details).

- Perform a loopback test by using CommFront's 232Analyzer software: Connect a USB-Dual-TTL 3.3V converter to your PC's USB port and short TX and RX on the TTL terminal block. Run 232Analyzer software on your computer and then send commands from the 232Analyzer software; you should receive an echo of the commands sent. By performing a simple loopback test like this, you can test both the transmitter and receiver of the USB-Dual-TTL 3.3V converter. This is very helpful when you are in doubt about the performance of your converter.
